

A modern office interior with a blue ceiling, large windows, and black chairs. The scene is brightly lit, suggesting a sunny day. The floor is a light blue color, and the walls are white. There are several black chairs with metal legs arranged in a row. In the background, there is a reception desk and a potted plant.

Company Presentation

Jasper Electronics Co., Ltd.

About us

JASPER

Jasper Electronics Co., Ltd., is specialized in human interface products development and manufacturing, primarily membrane switch, rubber keypad, flexible circuit, and keypad assemblies. Currently our production area occupies 2500 sqm, and over 60 employees. We also offer outsourcing services that are vertically integrated with components capabilities to optimize our OEM customer's operations and time to market.

At Jasper, we believe quality is key to business growth. We have a stringent QC program in place, which keeps our product defect ratio low at less than one percent. We are committed to providing the one-time perfect quality and value-added services.

Company Philosophy

JASPER

- Our success is based on customers' satisfaction, and it is what's inside that counts.
- We are committed to give our priority to the needs of society with a long-range perspective. Moreover, we are committed to our customers who bestowed their trust on us to continue our efforts in design to their needs.

Vision:

To be a world leading manufacturer of human-interface products, and first choice supplier of our customers

Mission:

To make our customers satisfied with both our products and service.

Value:

(principle)		(method)
Integrity	→	Pragmatic
Responsibility	→	Enterprising
Professionalism	→	Innovative
Teamwork	→	Collaborative

JASPER

History

JASPER

- **in 2006 Jasper Electronics Co., Ltd. was set up as an independent marketing division;**
- **in 2008 Fuming was acquired by Jasper Electronics Co., Ltd. Almost every process of production has been fully-automated, eg silk printing, die-cutting, ink-curing.**
- **in 2014 Jasper Electronics started a new facility in Shenzhen**
- **in 2018 Jasper Electronics moved to Humen town of Dongguan.**
- **in 2020 Jasper Electronics relocated to new facility of Dongguan. With 2500 square meters state-of-art facilities and over 10-year engineering and production team, we are in better position to serving our customers' need.**

Advantage

- 1) 16yrs manufacturing experience. Ever since inception in 2006, it is dedicated to production of nameplate products. Later on, business activities was expanded to membrane switch, label, rubber keypad and electronics assemblies. Most of our management team have over ten years of working experience in screen printing industry. Many of world-class companies have established the strategic relations with us, eg Midea, TCL and Amphenol.
- 2) fully-automated industrial process and high economic efficiency. Almost all industrial process has been fully-automated, primarily CCD silk printing, die cutting and lamination. This ensure our extremely high production efficiency, maintaining tight accuracy. Tis may help our clients save substantial amount of cost and give you the sharp advantage.
- 3) Extensive products categories. We can produce membrane switch, nameplate, rubber keypad, FPC and keypad assemblies in house, and also providing the complete human interface solution.
- 4) Specialized test instrument. With both full-automation and semi-automation testers, we may proceed functionality test on LED, open/short circuit, loop resistance value and even high-pot test. The keypad lifecycle tester, 2D tester and etc. are available.
- 5) ISO9001/TUV certified. Our organization was ISO9001:2015 certified in 2016, and its status maintained year after year. And we are also TUV certified in 2022. The inspection report will be provided for each shipment.

Advantage

- 6) 10000 clean grade workshop. Very clean environment ensure our products has good aesthetic appearance quality.
- 7) Fast prototyping. Digital printing is available in our house. 3 laser-cutting machines enable us to do cutting work for small volume orders and even make embossing mould by ourselves. With specialized engineering and prototyping team, we can provide both drawing and samples in quick around, say 1~3 days.
- 8) Material quality. All the material are RoHs compliant, and they are procured from world/Asian premier companies, eg GE, Autotex, Dupont, 3M, Jujo. Only those material which have been passed by our stringent quality system may go to next production procedure and shipped to our customers.
- 9) Proven Technology. We have adopted the most advantaged assemble technology, eg backlight type with LED/EL/LGF, buttons with epoxy doming, 4-color printing, 3D printing, water-proof, circuit assemblies with rubber keypad, metal backing, LED display and so on.
- 10) Customer service. We know customer service is core competence of one enterprise. Customer service advantage by Jasper Electronics helps make the connection between valued employees and valued customers. We take care of customers' need, meanwhile dedicated to continuous improvement of our organization especially on training of employees. All our staffs are received training courses, which have fostered high sense of unity and may meet the ever-increasing demands of our organization and customers.

*What can we do for
you...*

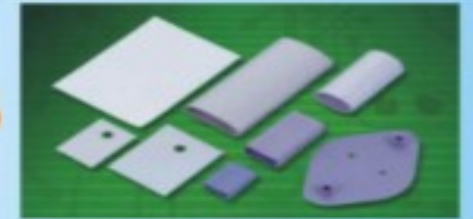

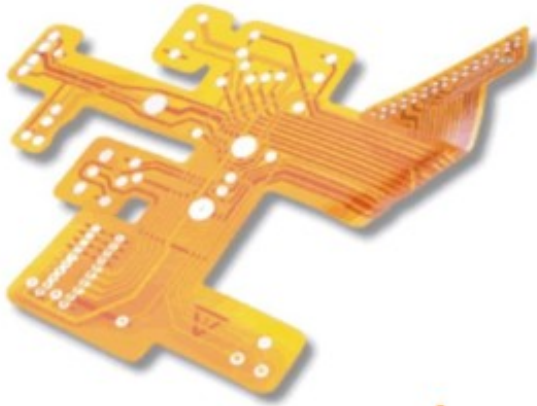

Membrane Switches

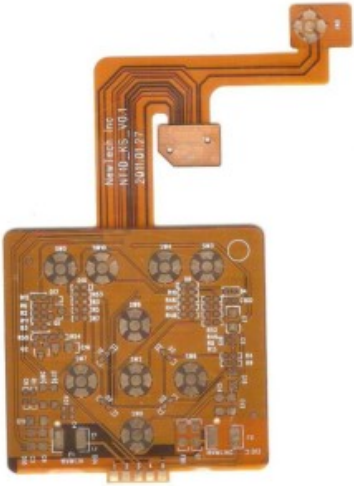

Rubber Products

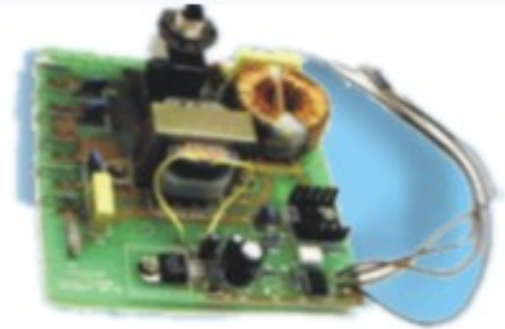

Flexible Circuits

Our service

Jasper is one of EMS factories which offer customers with highly integrated sub-assemblies as fully assembled and tested units. With the engineers formally from Foxconn, extensive supplier chain network and group company's manufacturing facilities, Jasper can help develop the human interface system solution and provide one-stop solution service. SMT and Through-hole components assembly are available at our sites.

JASPER

Equipment List:

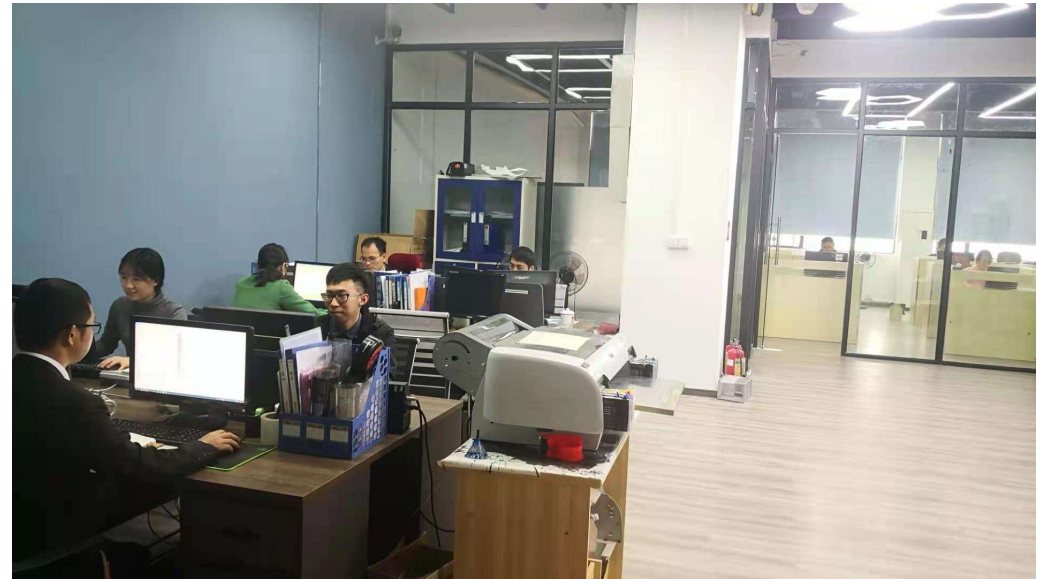

- 4 full-automation printers with UV curing;
- 6 semi-automatic printers;
- 1 prototyping printer, 1 inkjet printer & 1 3D printer
- 1 18 meter tunnel oven including both IR and UV oven
- 3 Ovens
- 2 stamping presses;
- 2 hydraulic's;
- 3 heat embossing machines;
- 2 full-automatic die-cut machines;
- 2 CCD hole punching machine, 2 mechanic's;
- 4 laser-cutting machines;
- 1 frame-drying machine
- 4 keypad functionality testers
- 3 pin-cramping machines
- 2D dimension checker

Glimpse on Jasper:

- Reception Desk

- Office

Glimpse on Jasper:

- 3 full-automation Printers

Glimpse on Jasper:

- 6 semi-automation printers

Glimpse on Jasper:

- 4 Diecut Machines

- 4 Laser Cutting Machines

- 1 full-automation puncher
- 2 CCD hole punchers

Glimpse on Jasper:

- Assembly

- Film-lamination & Pin-cramping

Glimpse on Jasper:

- Electrical Test

- Visual Inspection

Glimpse on Jasper:

- Life-cycle Tester

- 2D Tester
