

Dongguan Jasper Electronics Co., Ltd.

Our Expertise Is Dedicated to Safeguarding Your Health.

Professionalism Builds Trust

Professionalism earns trust

Jasper's service team is dedicated to delivering personalized customer support. By attentively listening to each client's needs and providing thorough communication along with professional recommendations, we ensure that our products and services fully meet their specific requirements.

The company's service team is always on standby to ensure prompt response and resolution of customers' inquiries and needs.

Product Inquiry our service

Jasper Service Team consists of experienced professionals with deep expertise in medical auxiliary materials products. Whether it involves product selection, usage, or maintenance, our team can provide professional consulting services.

Jasper's goal is to help customers better understand and utilize the company's products, thereby enhancing the efficiency and safety of medical procedures.

Customized Service our service

To meet the diverse needs of different clients, Jasper offers customized service solutions. The company's service team will design and implement personalized service plans based on each client's specific circumstances and requirements.

This includes, but is not limited to, product customization, response to special needs, and long-term collaboration plans, ensuring the company's services precisely meet customer expectations.

Our Products

OUR PRODUCTS

Dongguan Jasper Electronic Co., Ltd., a leading company in the medical device industry, specializes in the research, development, production, and sales of high-quality auxiliary materials including disposable neutral electrodes, ECG electrodes, physiotherapy electrodes, muscle electrodes, TAB conductive adhesive, physiotherapy conductive adhesive, medical aluminum foil, conductive films, and electrode clips.

The company's products have earned widespread market acclaim, thanks to Jasper's unwavering commitment to its core values of innovation, quality, and service.

The company's products continuously drive technological innovation and strive for ongoing performance optimization to meet evolving market demands.

Disposable Neutral Electrode

Single-use neutral electrodes, commonly referred to in the market as electrosurgical knife negative plates, electrosurgical knife circuit boards, or electrosurgical electrode sheets. Widely used in various surgical procedures, it is connected to the high-frequency electrosurgical unit to provide a low-current-density return pathway for high-frequency currents.

Dedicated care ensures unimpeded health.

Fujia Kang Series Disposable Electrocardiographic Electrodes

Disposable ECG electrodes are physical sensors that transmit physiological signals to ECG monitoring equipment, suitable for cardiac monitoring applications such as in hospitals (ICU, CCU), exercise treadmill testing, and anesthesia. The product primarily consists of conductive adhesive, a silver-plated buckle and a backing layer, with the backing layer material being non-woven fabric or foam.

JASPER: The Wisdom of Taste

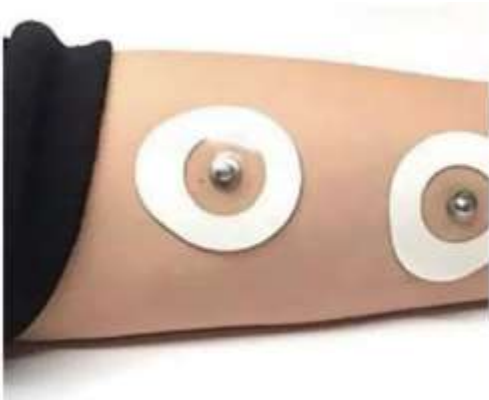

规格: 47mm x 48mm 胶体: 固体导电胶 背衬: 水刺无纺布 (良好透气性)

规格: $\phi 42\text{mm} \times 24\text{mm}$ 胶体: 固体导电胶 背衬: 泡棉

规格: $\phi 30\text{mm} \times 36\text{mm}$ 胶体: 固体导电胶 背衬: 泡棉

Careful Material Selection

Select materials with care and craft them meticulously. Ensure high-quality medical services

Solid Gel

Exhibits excellent adhesion, uniform thickness, and resistance to deformation; the colloidal surface is smooth and odorless.

Strong Anti-Interference Capability

It exhibits uniform conductivity, lacks cellular irritancy, and can transmit clear electrocardiogram signals.

规格: $\phi 55\text{mm}$ 胶体: 固体导电胶 背衬: 水刺无纺布/泡棉

Raw Materials and Auxiliary Materials

Ceriga provides a range of high-quality medical auxiliary materials, including hydrogels, aluminum foil, conductive films (carbon films), and electrode clips.

With its outstanding performance and reliability, the product is widely utilized in medical devices and therapeutic procedures to enhance treatment efficacy and patient comfort.

Reliable Quality

Strict quality control process and careful production of every product.

Careful selection of materials

High-quality raw materials ensure the safety and efficacy of the products.

Abundant species

A diversified range of products to meet various medical device and therapeutic requirements.

TAB Conductive Adhesive

Specifications: 0.5 mm × 230 mm × 100 m

Physiotherapy (neutral Electrode) Conductive Adhesive

Specifications: 0.8 mm × 230 mm × 100 m

JASPER: The Wisdom of Taste

Dedicated care ensures unimpeded health.

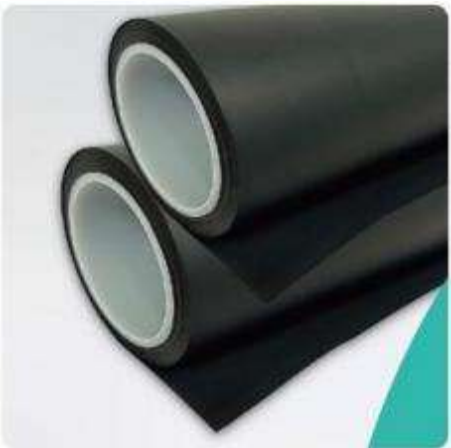

Strong anti-interference capability, uniform conductivity, no cellular irritation, and capable of transmitting clear electrocardiogram signals.

Aluminum Foil (medical)

Specifications: 0.07 mm × 225 mm × 750 mm

Conductive Film (carbon Film)

Specifications: 0.05 mm × 250 mm × 500 m

Electrode Clip

Specifications: Dimensions are customizable
