

A modern office interior with large windows, blue chairs, and a blue ceiling. The scene is bright and airy, with natural light streaming in from the windows. The floor is a light blue color, and the ceiling is a darker blue. The chairs are arranged in a row, and there is a small table in the background.

Company Presentation

Jasper Electronics Co., Ltd.

About us

Jasper Electronics Co., Ltd., is specialized in human interface products development and manufacturing, primarily rubber keypad, membrane switch, and keypad assemblies. Currently our production area occupies 2500 sqm, and over 60 employees. We also offer outsourcing services that are vertically integrated with components capabilities to optimize our OEM customer's operations and time to market.

At Jasper, we believe quality is key to business growth. We have a stringent QC program in place, which keeps our product defect ratio low at less than one percent. We are committed to providing the one-time perfect quality and value-added services.

Company Philosophy

- Our success is based on customers' satisfaction, and it is what's inside that counts.
- We are committed to give our priority to the needs of society with a long-range perspective. Moreover, we are committed to our customers who bestowed their trust on us to continue our efforts in design to their needs.

Vision:

To be a world leading manufacturer of human-interface products, and first choice supplier of our customers

Mission:

To make our customers satisfied with both our products and service.

Value:

(principle)		(method)
Integrity	→	Pragmatic
Responsibility	→	Enterprising
Professionalism	→	Innovative
Teamwork	→	Collaborative

History

- in 2006 Jasper Electronics Co., Ltd. was set up as an independent marketing division;
- in 2008 Fuming was acquired by Jasper Electronics Co., Ltd. Almost every process of production has been fully-automated, eg silk printing, die-cutting.
- in 2014 Jasper Electronics started a new facility in Shenzhen
- in 2018 Jasper Electronics moved to Humen town of Dongguan.
- in 2020 Jasper Electronics relocated to new facility of Dongguan. With 2500 square meters state-of-art facilities and over 10-year engineering and production team, we are in better position to serving our customers' need.

工艺流程 PROCESS FLOW

P+R buttons

Product process: silicone transparent bottom oil pressure/material injection → bottom oil spraying (electroplating) → product printing → surface oil spraying → radium engraving → UV spraying → inspection → punching → assembly → inspection → packaging and shipping

All kinds of silicone products

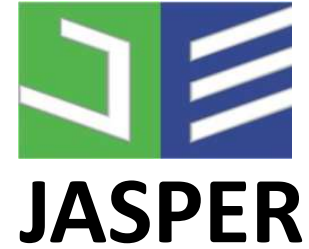

Product process: mixing color → cutting → oil pressing → (oil spraying/printing/radium/carving/assembly) → edge removal → inspection → packaging and shipping

Rubber Keypad

Product process: Silicone button oil-pressure molding → bottom oil spraying → printing → surface oil spraying → radium engraving → PU/feeling-oil spraying → Inspection → packaging and shipping

Our partners

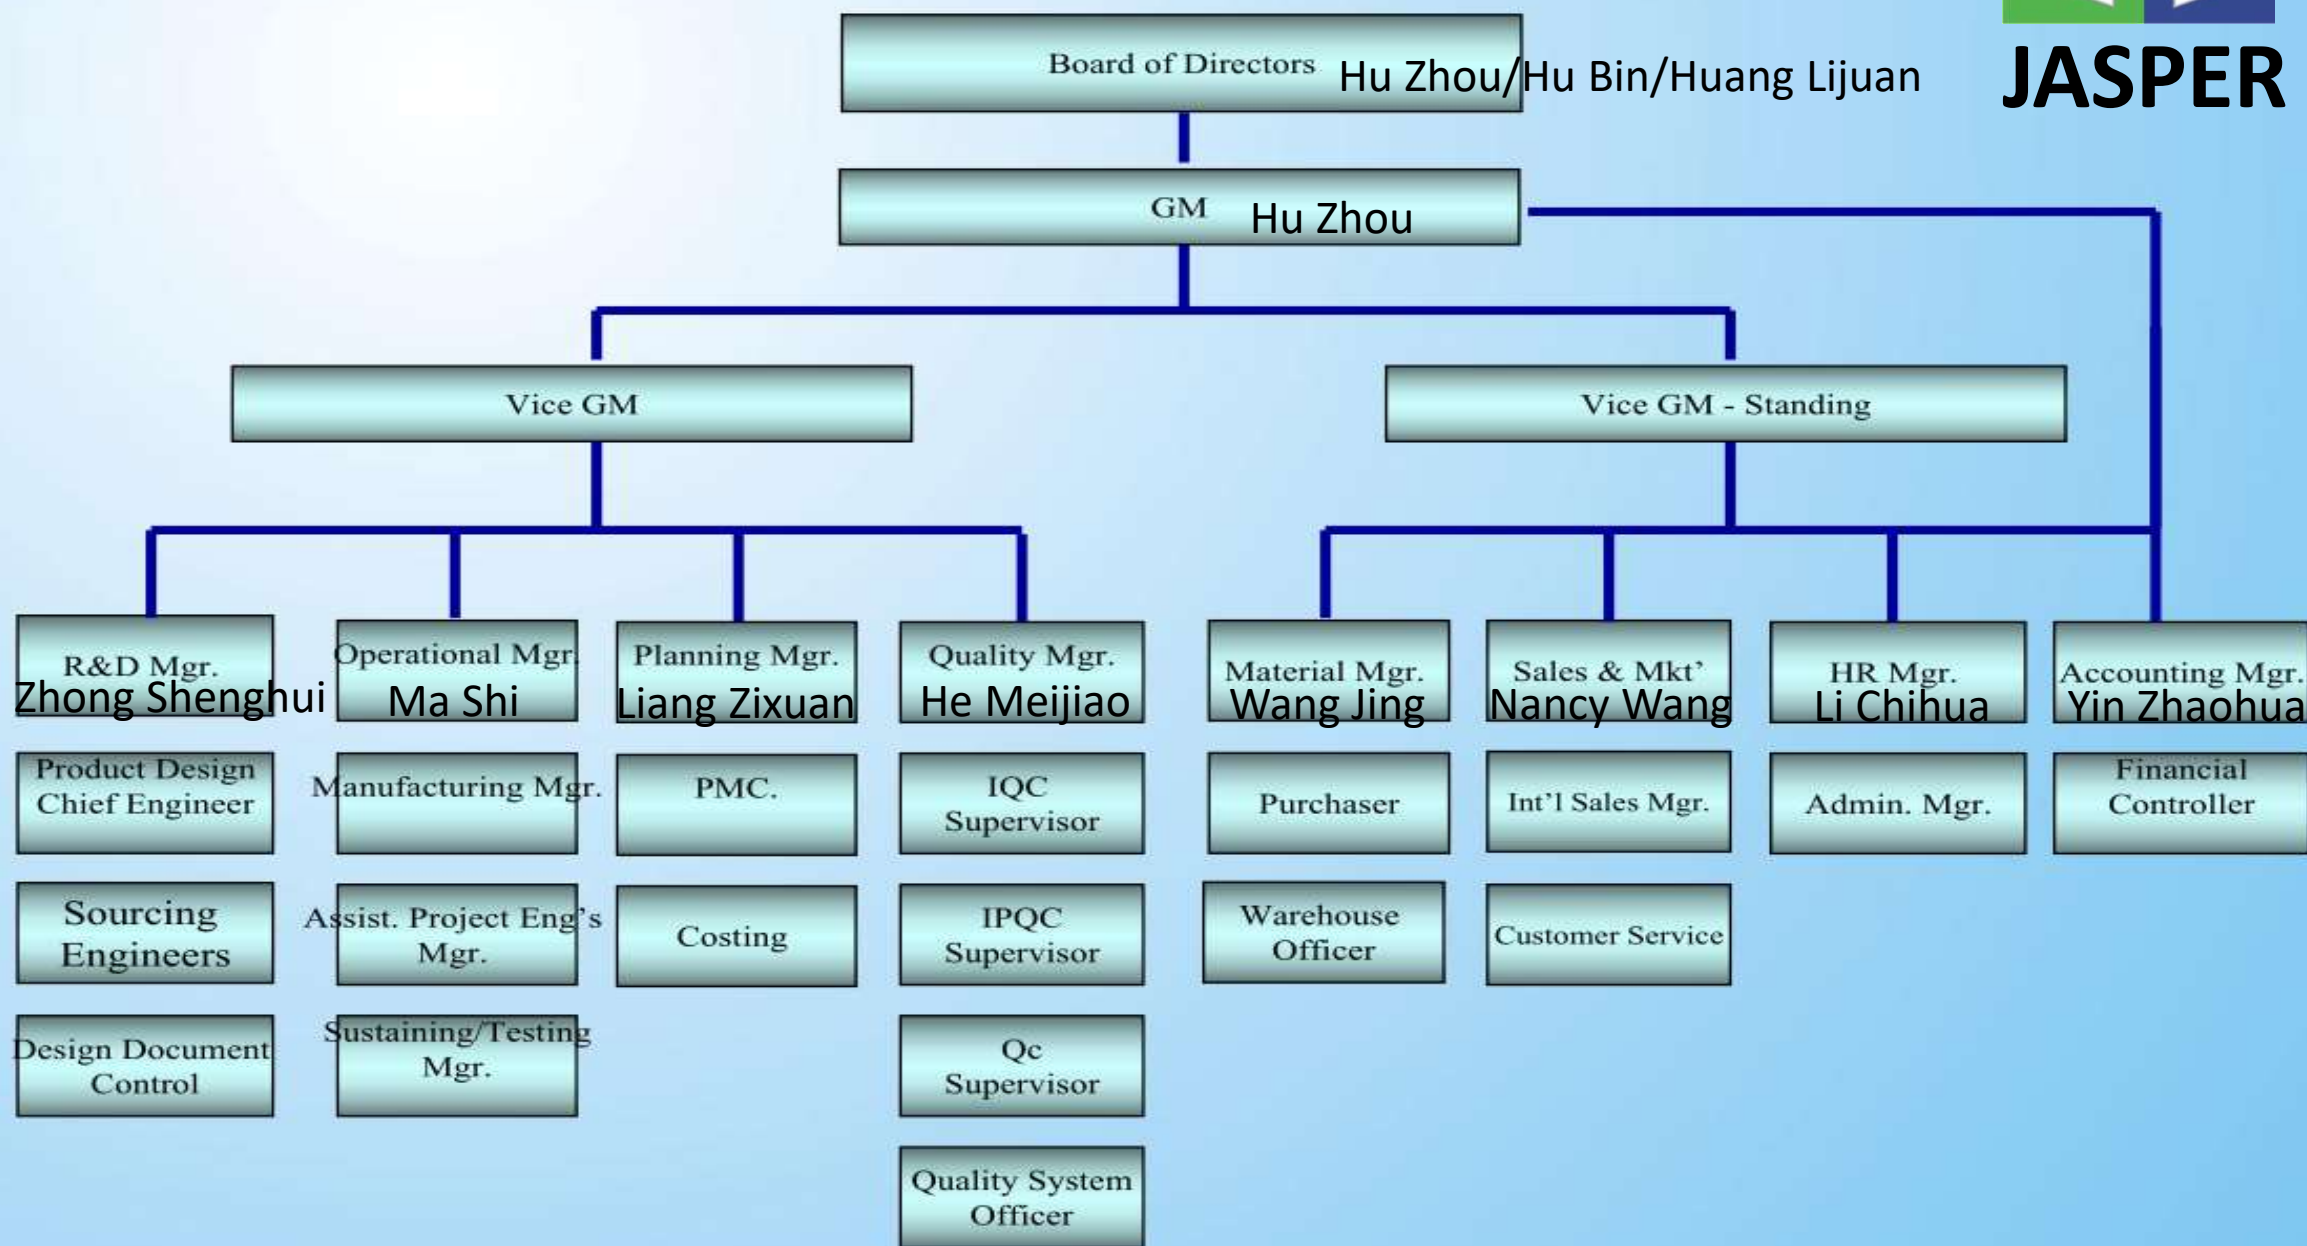

We are proud of the trust and loyalty that some of world-class companies places in us today.
